

Submission Pack – Team Merlin Digital

Quantum-in-the-Loop Training and Certified Runtime Assurance for Autonomous Driving. Tracks: RL Alignment (primary scored) + Safety Guarantees (secondary scored). Everything below is written in plain language for the judging panel, with every number traceable to a receipt.

Deadline: 2026-09-15

Prior result: runner-up, GIC 2026 Mitsubishi/AIST

~90 receipted quantum jobs

DOCUMENTS IN THIS PACK – EXPORT EACH TO PDF FOR UPLOAD

01 · REQUIRED DELIVERABLE Technical Report The 4–8 page report the rubric requires: method, theoretical motivation, experimental setup, results vs the accepted baselines, mandatory ablations, negatives, and the resource declaration.	02 · JUDGE-FACING ONE-PAGER Executive Summary One page, plain language: the three headline results (~35.4% training budget, 78→100% safe, +9.3 pts robustness), why they can be trusted, and the long-term hardware case.	03 · VERIFICATION GUIDE Reproducibility & Receipts How a judge verifies every headline number in minutes, credential-free; the claim → file → job-ID map; the rubric compliance matrix; environment and dependencies.
---	--	--

UPLOAD CHECKLIST

1. **Technical Report PDF** – export document 01 (satisfies the 4–8 page report requirement, §5.2)

2. **Executive Summary PDF** – export document 02 (optional but recommended first page for judges)

3. **Reproducibility & Receipts PDF** – export document 03 (covers the replication + resource-declaration requirements)

4. **Code + results archive** – zip the existing `VW_SUBMISSION_PACKAGE/` folder as-is (scripts, `results/` JSONs, README, RECEIPTS.md) – or link the public repository if the portal asks for a URL

5. **Before upload, confirm:** team contact details on the report header; the public repo is actually public; portal file-size limits (split the archive if needed)
